Lab Task # 02

Submitted To: **Mr. Muhammad Azhar**

Student Name: **Ayesha Munir**

Reg. Number: **23108106**

Windows Python Environment Install and Setup

Step 1: Download and Install Python

Installing Anaconda Navigator

Create a Jupyter Notebook File (.ipynb)

Basic Operation on Jupyter Notebook

Solution:

Windows Python & Jupyter Setup Guide

This repository explains how to install and configure:

- Python
- Anaconda Navigator
- Jupyter Notebook

on Windows systems.

Installation Steps

Install Python

- Download from python.org
- Check:
    - Add to PATH
    - Install for all users
- Click Install Now
- Disable path length limit

Install Anaconda

- Download installer from anaconda.com
- Select "Just Me"
- Choose installation directory
- Complete installation

Launch Jupyter Notebook

- Open Anaconda Navigator
- Click Launch under Jupyter Notebook
- Click New → Python 3

- Start coding in .ipynb file

Tools Included

✓Python Interpreter

✓ Anaconda Distribution

✓ Jupyter Notebook

✓ Package Manager

Workflow

Download → Install → Configure → Launch → Create Notebook → Write Code

Recommended For

- Beginners in Python
- Data Science students
- Machine Learning labs
- Academic coursework
